

TABLE OF CONTENTS

KEYNOTE 102# Protection of urban areas by using city furniture and landscape architecture.....	16
<i>Prof. Norbert Gebbeken</i>	
KEYNOTE 111# Blast analysis in the urban environment.....	18
<i>Nicolas K. Misselbrook</i>	
KEYNOTE 110# Laboratory testing of ductile and brittle materials under high strain rates.....	19
<i>Prof. Alexis Rusinek</i>	
KEYNOTE 106# Near-field blast loading: The challenges for measurement and prediction.....	20
<i>Prof. Andrew Tyas</i>	
KEYNOTE 112# Constitutive modelling and simulation of materials and structures under extreme loadings due to impact loading at high strain rates.....	21
<i>Prof George Z. Voyiadjis</i>	
KEYNOTE 14# Ductal® material model for finite element analyses of blast and impact effects.....	23
<i>Shengrui Lan & Svatopluk Dobrusky</i>	
1# Perforation resistance of infrastructure materials.....	25
<i>M. Seidl, A. Klavzar, A. Bongartz, S. Greulich</i>	
2# Measuring overpressure caused by the detonation of explosives inside a horizontal tube.....	28
<i>Petr P. Prochdzka, Martin J. Vdlek, Dagmar Jandekovd</i>	
3# Numerical simulations of commercial aircraft impacting on the API 000 nuclear power plant.....	31
<i>Wu H, Fang Q, Zhang T, Zhao YY</i>	
4# Experimental study of a novel multi-hazard resistant prefabricated concrete frame structure.....	32
<i>Kaiqi Lin, Xinzheng Lu, Yi Li, Wenjie Liao</i>	
5# Urban security planning and design.....	35
<i>Chunlin Liu, John Crawford</i>	

6# Numerical study on modeling of diamond-shaped wire net for rockfall protective structures.....	36
<i>Masato Komuro, Hisashi Kon-no, Hiroaki Nishi, Norimitsu Kishi</i>	
7# Approximate solutions on the Alekseevski-Tate model of long-rod penetration	39
<i>X.W. Chen, W.JJiao</i>	
8# Falling-weight impact test of FRP rods NSM RC beams.....	41
<i>Norimitsu Kishi, Masato Komuro, Hiroshi Mikami</i>	
9# Experimental research on performance of steel-concrete-steel sandwich composite shells under patch loading by a hemi-spherical head.....	45
<i>Chen Yan, Ximei Zhai, Yonghui Wang</i>	
10# Damage type and damage index for K8 single-layer reticulated domes under exterior blast loading.....	46
<i>Ximei Zhai, Yonghui Wang, Zhenyu Sun</i>	
11# Development of dimensionless P-I diagram for curved steel-concrete-steel sandwich shell.....	47
<i>Yonghui Wang, Ximei Zhai</i>	
12# Experimental study of the aluminum foam filled energy absorption connector under impact loading.....	48
<i>Yonghui Wang, Ximei Zhai</i>	
13# Impact response analysis of RC beams strengthened with NSM-AFRP rods...	49
<i>Tomoki Kawarai, Masato Komuro, Norimitsu Kishi and Yusuke Kurihashi</i>	
15# Study on cushioning characteristics of high-damper rubber protective structures	52
<i>Zhou Huang, Fei Zeng, Hongmei Li, Fengjun Wang, Xin Huang</i>	
16# Dynamic response of aluminum matrix syntactic foams sandwich panel subjected to metal foam projectile impact loading.....	53
<i>Zhang Boyi, Wang Wei, Zhai Dongxian, Jiang Yuexin</i>	
17# Analytical model for the response of arching masonry walls under blast loading	54
<i>Idan E. Edri, David Z. Yankelevsky</i>	
18# Local deformation analysis of short span steel pipe beams against huge boulder impact.....	55
<i>Nobutaka Ishikawa, Hiroshi Kokuryo, Masuhiro Beppu</i>	

19# Performances of reinforced concrete bridge columns under vehicle impact . . .	59
<i>Tin V. Do, Thong M Pham, Hong Hao</i>	
20# Ballistic resistance of Ductal® Ultra-High Performance Fiber-Reinforced Concrete (UHPFRC).....	60
<i>Svatopluk Dobrusky, Emmanuel Bonnet, Sebastien Bernardi, Damien Jacomo</i>	
21 # Reduced properties of RC elements subjected to fragmentation impact	62
<i>Hezi Y. Grisaro, Avraham N. Dancygier, David Benamou</i>	
22# On the mesomechanism of failure waves in polycrystalline alumina subjected to shock compression.....	63
<i>Xiaowei Feng, Juncheng Li, Jingzhen Chang, Hongbo Wang, Kun Deng</i>	
23# Attenuation of the stress wave in coral sand by a new quantitative methodology with improved SHPB.....	64
<i>Xiao Yu, Li Chen, Qin Fang</i>	
24# Behaviour of Ultra-High Performance Fibre-Reinforced Concrete (UHPFRC) filled steel tubular members subjected to lateral impact loading.....	66
<i>Weiqiang Wang, Chengqing Wu</i>	
25# An investigation of steel wire mesh reinforced high-performance geopolymer concrete subjected to blast load.....	67
<i>Qingfei Meng, Chengqing Wu, Jun Li</i>	
26# Numerical study of blast performance of concrete filled double-steel-plate composite walls.....	69
<i>Zejun Zheng, Jun Yu, Fangfang Wei, Yongquan Wang</i>	
27# Design codes on performance improvement of blast protection using sacrificial members.....	70
<i>Changsu Shim</i>	
28# Reliability-based load factors for airblast and structural reliability of protective structures.....	71
<i>Mark G Stewart</i>	
29# Airblast variability and fatality risk estimation for explosive blasts in confined building spaces.....	72
<i>Dariusz Alterman, Mark G Stewart, Michael D. Netherton</i>	
30# Field blast testing and numerical investigation of fence type blast wall.....	73
<i>Yifei Hao, Hong Hao, Ming Jin</i>	

31# The University of Newcastle's repeatable explosive blast field trials.....	74
<i>Michael D. Netherton, Mark G Stewart</i>	
32# An efficient model for progressive collapse analysis of RC structures under blast loading.....	75
<i>Zhong-Xian Li, Bo Zhong, Yanchao Shi</i>	
33# Parametric study of a column-slab connection punching under the impact of the upper slab.....	79
<i>David Yankelevsky, Yuri Karinski, Vladimir Feldgun, Dina Tzemakh</i>	
34# Shock induced a-iron phase transition studied with DEM.....	80
<i>Liu Chao, Wang Pei</i>	
35# Design and optimization of an anti-shock multilayer protective structure for electronic devices.....	81
<i>Bo Liu, Xiangli Cheng, He Yang, Haifu Ye, Min Jiao, Mengmeng Han</i>	
36# Design of protective structure and simulation study on fuze under impact loading.....	82
<i>Mengmeng Han, Yulin Cao, He Yang, Cha Xu, Bo Liu, Dongjie Li</i>	
37# Simulation and experiment study on protection of key electronic components in penetrating fuze.....	83
<i>Mengmeng Han, He Yang, Bo Liu, Hongzhi Zhu, Bo Yang, Zhongcai Zhang</i>	
38# Study on stability of a converging cylindrical shock after perturbed by a sinusoidal Air/SF6 interface.....	84
<i>Fan Lei, Qiubo Fu</i>	
39# Experiment and analysis of 3D composite floor system under a penultimate internal column removal scenario.....	86
<i>Yong Yang, Deyang Kong, Bo Yang</i>	
40# Experimental overpressures inside a masonry box subjected to external blast loading.....	87
<i>Ramon Codina, Daniel Ambrosini</i>	
41 # Protective potential of a metallic foam with ceramic inclusions.....	88
<i>S. Szyniszewski, T. Fras, R. Vogel, T. Hipke, M. O. Sturtzer</i>	
42# Material surface heterogeneity effects on metal micro-jetting ejection behavior at high-speed impact loads.....	90
<i>Yi-Na Shi, Pei Wang, Qi-Jing Feng</i>	

43# A method for evaluating the local failure of fiber-reinforced concrete plates subjected to projectile impact.....	92
<i>Masuhiko Beppu, Hironori Ueno, Atsuhisa Ogawa</i>	
44# Failure behavior of RC slabs subjected to deformable projectile impact	95
<i>Shinnosuke Kataoka, Masuhiko Beppu</i>	
45# Equation of state of explosive detonation products.....	99
<i>Yan-hong Zhao, Hai-feng Liu, Gong-mu Zhang</i>	
46# Response of box-type reinforced concrete structure under blast load	101
<i>Lekhani Gaur, Priyanka Kolakani, Tanusree Chakraborty, Vasant Matsagar, Ashish Darpe</i>	
47# Experimental procedure for determination of energy absorption capacity for UHPFRC under localized impact loading.....	104
<i>Petr Konrâd, Radoslav Sovjâk</i>	
48# Behavior of sand subjected to low velocity impact loads: application to the protection of structures from rock falls.....	107
<i>Tarik Oussalah, Jean-Pierre Rajot, Yannick Fargier, Marion Bost, Patrick Joffrin, Christophe Pruvost</i>	
49# Failure mechanisms within unreinforced concrete wall under rockfall impact loading.....	108
<i>Marion Bost, Alim Limam, Yannick Fargier, Patrick Joffrin, Christophe Pruvost</i>	
50# Test results of the new protective system for mitigating of explosions.....	109
<i>Nikoloz Chikhradze, Edgar Mataradze, Mikheil Chikhradze, Ted Krauthammer</i>	
51 # Effectively Characterizing the Effects of Blast Loadings.....	110
<i>John E. Crawford, Leonardo M. Torres, Yifan Z. Fu, and Daniel Coleman</i>	
52# Blast loads analysis on cube and box-shape building.....	112
<i>Bueno, Jeferson Rafael; Léger, Pierre</i>	
53# Analog system of detonations with loss and stability analysis.....	113
<i>Yuanxiang Sun, Cheng Wang</i>	
54# Experimental investigation of corrugated metal sheets subjected to blast loading	114
<i>Kai Fischer, Alexander Stolz, Christoph Roller</i>	

55# Parametric design of re-entrant auxetics for efficient blast energy absorption	115
<i>Hasan Al-Rifaie, Wojciech Sumelka, Piotr W. Sielicki</i>	
56# Field tests on the local damage of reinforced concrete slabs under close-in explosions.....	118
<i>Yanchao Shi, Jing Wang, Zhongxian Li</i>	
57# A substructure method for progressive collapse analysis of steel frame from external explosions.....	119
<i>Yang Ding, Yanchao Shi, James S. Davidson</i>	
58# The experimental study of blast pressure loading acting on the human hidden behind the building.....	120
<i>Tomasz Gajewski, Piotr W. Sielicki</i>	
59# Static and dynamic compressive properties of clay bricks.....	122
<i>Xihong Zhang, Yu-Wen Chiu, HongHao, Ariel Hsieh</i>	
60# Improvement of impact resistance capacity for precast segmental column with FRP wrap.....	123
<i>Xihong Zhang, Hong Hao, Chao Li</i>	
61 # The behaviour of the concrete slabs with steel fibres under projectile impact: the experimental study.....	124
<i>Agnieszka Slosarczyk, Piotr W. Sielicki, Dominik Szulc</i>	
62# The reinforced concrete columns subjected to close-in blast loading	125
<i>Agnieszka Slosarczyk, Piotr W. Sielicki, Dominik Szulc</i>	
63# Impact resistance performance research of semi-flexible pavement material.	126
<i>ZHANG Chao, ZHANG Yong, LIU Hong-wei</i>	
64# Double mixing concrete antiknock performance test research.....	129
<i>ZHANG Chao, ZHANG Yong, LIU Hong-wei</i>	
65# Predictive simulation of the response of adobe masonry during impact and explosion loads.....	132
<i>Andreas Heine, Christoph Sauer, Werner Riedel</i>	
66# Stress wave attenuation optimization in multilayered pavements subjected to extreme dynamic events.....	134
<i>David Whitmore, Marta Miletic, Alessandra Bianchini and James Davidson</i>	

67# Optimization of a Split-Hopkinson pressure bar device in order to investigate controlled multipulse loading on granular materials.....	135
<i>Maria Luisa Ruiz-Ripoll, Leopold Kruszk, Christoph Roller, Alexander Stolz</i>	
68# Dynamics of elements of protective structures for vehicles under local impact loads.....	137
<i>Leopold Kruszk, Yurii Vorobiov, Nataliia Ovcharova</i>	
69# Experimental analysis of perforation resistance of construction built materials taken into account a wide range of elevated temperatures.....	140
<i>Jacek Janiszewski, Maciej Klosak, Leopold Kruszk, Małgorzata Pająk, Arkadiusz Pękacz</i>	
70# Analytical modelling of experiments on blast loading on structural elements without using explosive charges.....	143
<i>Vladimir Feldgun, David Yankelevsky, Yuri Karinski</i>	
71# Analytical modelling of rigid projectile penetration into concrete medium....	145
<i>Vladimir Feldgun, David Yankelevsky, Yuri Karinski</i>	
72# Assessment of support and attachment conditions used in masonry blast response research.....	147
<i>John Hoemann and James Davidson</i>	
73# Predicted explosive load distribution on window cubicles.....	148
<i>John Hoemann, William Hossley, James Davidson</i>	
74# Dynamic behavior of reinforced concrete slabs Blasting test - only one chance - experimental and numerical investigations.....	149
<i>Marcus Hering, Tino Kiihn, Ulrich Hâufiler-Combe, Manfred Curbach</i>	
75# Behaviour of concrete reinforced with fibers from end-of-life tires under high compressive strain rates.....	150
<i>Małgorzata Pająk, Jacek Janiszewski, Leopold Kruszk</i>	
76# Impact resistance performance assessment of wire ring net guard fence using full scale test and numerical analysis.....	154
<i>Yoshimi Sonoda, Kazuki Fukunaga</i>	
11# Scaling of buried composite arch structure under internal blast loading	155
<i>Pang Sze Dai, Abraham Christian, Yang Yi, Liew Jat Yuen Richard</i>	
78# P-I diagram method for performance-based design of RC beam under blast loading.....	157
<i>Jinchun Liu, Ziqi Wang</i>	

79# Strengthening effect of externally reinforced RC structure with SIFRCC on impact load.....	158
<i>Seugnwon Kim, Cheolwoo Park</i>	
80# Numerical simulation and experimental testing of tire subjected to blast loading	159
<i>Paweł Baranowski, Jerzy Małachowski, Piotr Sielicki</i>	
81# Numerical simulation and experimental testing of protective panels	161
<i>Paweł Baranowski, Jerzy Małachowski, Piotr Sielicki</i>	
82# Local effects of ballistic impacts on UHPFRC targets.....	163
<i>Maria Celeste Blasone, Pascal Forquin, Julien Baroth, Dominique Saletti, Svatopluk Dobrusky</i>	
83# Failure characteristics of high performance fibre reinforced cementitious composites under high-speed projectile impact.....	164
<i>Won-Woo Kim, Sung-Wook Kim, Jang-Wha Lee, Jung-Joon Park, Gi-Joon Park, Jae-Heum Moon</i>	
84# Development of SIS for use in intense blast environments.....	166
<i>John E. Crawford, Hyung-Jin Choi, Leonardo M. Torres, and Hossein Sadeghi</i>	
85# Experimental data characterizing the behaviors associated with shear transfer across shear cracks in RC components.....	168
<i>Mark Weaver, John E. Crawford, Dominic Wilmes, Zach Smith</i>	
86# Impact resistant capacity and failure behaviour of RC slab with corroded reinforcement.....	169
<i>Hiroki Tamai, Yoshimi Sonoda</i>	
87# Effect of textile reinforcement on the tensile behavior of Strain-Hardening Cement-based Composites (SHCC) under impact loading.....	171
<i>Ting Gong, Ali A. Heravi, Iurie Curosu, Viktor Mechtcherine</i>	
88# Blast enhanced dissipative facade fixation optimized by true balanced design approach.....	173
<i>Frank Wellershoff Matthias Forch, Philipp Grosser, Daniele Casucci, Marc Zobec, Guido Lori</i>	
89# Mechanical response of Ti6Al4V regular cellular structures under drop-weight impact test loading conditions.....	175
<i>Paweł Płatek, Jacek Janiszewski, Paweł Baranowski, Tomasz Czujko, Anna Antolak-Dudka, Tomasz Durejko, Piotr Dziewit, Jerzy Małachowski, Tadeusz Szymczak</i>	

90# Vertical pushover analysis of a reinforced concrete frame structure under a column removal.....	178
<i>Seweryn Kokot</i>	
91 # Blast protection of glazing: a review by an industry partner.....	180
<i>Koh Kwang Wee, Mindy Loo, Abraham Christian, Wesley D'aranjo</i>	
92# Heterogeneous lightweight configuration for protection against 7.62 mm bullet impact.....	181
<i>KhurshidAhmed, Dr. A.Q. Malik, Dr. Iram Raza Ahmad</i>	
93# Mechanical behaviour of natural fibre reinforced cellular concrete.....	182
<i>Yinzhong Yan, Qingming Li</i>	
94# Experimental analysis of aluminium-rubber sandwich structure strength during perforation tests within a wide range of temperatures.....	185
<i>Maciej Klosak, Alexis Rusinek, Richard Bernier</i>	
95# Dynamic behaviour of flax fibre reinforced polymer under high-speed tensile loads.....	187
<i>Wenjie Wang, Zhong-Xian Li, Nawowi Chouw</i>	
96# Cladding blast mitigation performance of folded truncated square pyramid with infilled foam as core.....	188
<i>Zhejian Li, Wensu Chen, Hong Hao</i>	
97# A virtual reality platform for calculation and visualization of hazard zones in a complex city area.....	189
<i>Tomasz Piontek, Bartosz Bosak, Miłosz Ciżnicki, Piotr Kopta, Bogdan Ludwiczak, Michał Kułczewski, Wojciech Szeliga, Piotr W. Sielicki</i>	
98# Numerical investigations of the shock wave attenuation effects using protective barriers made of steel posts.....	190
<i>Weifang Xiao, Matthias Andrae, Norbert Gebbeken</i>	
99# Numerical investigations on the triple point path.....	191
<i>Weifang Xiao, Matthias Andrae, Norbert Gebbeken</i>	
100# Analysis of impact resistance and protective characteristics of fibre reinforced concrete plates.....	192
<i>Krzysztof Cichocki, Jacek Domski, Jacek Katzer, Mariusz Ruchwa</i>	
101# Validation of near-field blast loading in LS-DYNA.....	194
<i>Sam Rigby, Ben Fuller, Andy Tyas</i>	

103# Development and analysis of lightweight auxetic systems for blast and impact protection.....	206
<i>Alex Remennikov, Dulara Kalubadanage, Tuan Ngo, Chang Qi</i>	
104# Feasibility study on CERP strengthened RC beams subjected to impact loadings.....	208
<i>Kazunori Fujikake, Sam Soeum, Takahiro Matsui</i>	
105# Ultimate strengths of stiffened panels of TWIP steel subjected to perpendicular pressure loading.....	209
<i>Kyungsik Kim, Yoonsik Kim</i>	
107# Application of the shock wave theory for the assessment of crushing force in the open-cell copper foams.....	216
<i>Zdzisław Nowak, Marcin Nowak, Ryszard Pecherski</i>	
108# The concept of virtual cellular material in peridynamic modelling of deformation processes.....	217
<i>Ryszard B. Pecherski, Zdzisław Nowak, Eligiusz Postek</i>	
109# Numerical and experimental tests of shock wave effect on military vehicle	218
<i>Grzegorz Sławiński</i>	
113# Volumetric Properties Of Concrete Under True Tri-Axial Dynamic Compressive Loadings.....	222
<i>Jian Cui, Hong Hao, Yanchao Shi</i>
