

CONTENTS

	Page
INTRODUCTION.....	9
VIGGIANI C. - The stabilisation of the Leaning Tower of Pisa.....	11

GEOTECHNICS

CAMFRLOVA M. - Legacy of pollution in ZPA Nova Paka site.....	43
ĆWIRKO M. - The analysis of steel meshes strains applied in soil reinforcement. . . .	51
MUSIAŁ R. - Dynamic replacement formation - numerical model creating	59
ROKITOWSKI P. - Influence of high ground water table on distribution of measured road surface deflections.....	71
SIÓDMOK A. - The model research of stiffness in cohesive soil treated with the catalytic-physical technique.....	79
TYMOSIAK D. - Classification tests of cohesive soils types.....	89
UNIERSAŁ P. - Comparison of calculation methods of flexible pipeline buried in the ground.....	97

BUILDING CONSTRUCTIONS AND THEORY OF STRUCTURES

BULA A. - Numerical modeling of bonded single-lap joints in plane strain.....	111
KIJANKA M. - Analysis of foundation settlement caused by elimination of wall structure building deflection.....	119
KOŁODZIEJ J. - Polarization test of the impact of pH concrete pore solution on galvanized reinforcing steel.....	131
MAZUR W. - Research and analytical verification of composite action between wall and lintel made of AAC.....	139
PAMUŁA M. - Determination of influence of position of measuring system on the results of impedance tests of reinforcement.....	149
PASZEK N. - Agents influencing compressive strength of geopolymers	157
RECHA F. - FEM simulation sample fracture of concrete due to corrosion reinforcement depending on the adopted function weakness.....	165
SANEWSKI D. - Preliminary studies of using composite rods to reinforce a brickwork wall bent in a plane.....	173
SOLARCZYK M. - The procedure of determining interaction curve for rectangular cross section using simplified method.....	181

WYLEŻOŁ M. - Determining the conclusive deflections buildings in terms of design their straightening.....	191
ŻMIJ A. - Evaluation of validity of application of polymer-portland cement concrete in structural elements.....	199

ROAD ENGINEERING

BLADOSZEWSKA S. - The analysis of sensitivity of numerical model of communication embankment on selected modeling aspects.....	209
KRZĄKAŁA J. - Influence of hanger arrangements for main structural elements in tied-arch bridges.....	219
SMOLANA M. - Verification of numerical model based on load test values.....	227
PUDEŁKO B. - Measurement and analysis of noise in selected sections of expressways of Silesia.....	237

BUILDING MATERIALS

GIEROŃ D. - 3D concrete printing - state of the art.....	247
GOŁASZEWSKA M. - Limestone as a constituent of cement composites - theoretical study.....	255
JANIC A. - The ground granulated blast-furnace slag as the addition type II in composed of concrete - normalizing conditioning.....	267
PIETRZAK A. - Properties of composite cement containing nanoparticle titanium dioxide.....	275
PIZOŃ J. - Influence of hardening accelerating admixtures on long-term compressive strength of cement mortars.....	283
SOROCIĄK W. - Research idea on the influence of rejuvenators on asphalt mix after aging processes parameters.....	291
