

Contents

Chapter I

Determination of Crack Width for RC Beams in Flexure.....9

Maria WEODARCZYK, Marta LUTOMIRSKA, Duyen TRINH DUC

Chapter II

Buckling Resistance of Short Perforated Thin-Walled Bars - FEM Analysis
and Experimental Results.....21

Andrzej PIOTROWSKI, Marcin GAJEWSKI

Chapter III

Estimation of the Thin-Walled Beam Theory Predictions in Relation to Finite Element
Shell Solutions.....33

Cezary AJDUKIEWICZ, Marcin GAJEWSKI

Chapter IV

Reinforced Column-Supported Embankments: An Approximation Method
for Evaluating LTP Reinforcement.....55

Beata GAJEWSKA, Marcin GAJEWSKI

Chapter V

Smoothed Podgórski and Ottosen Limit State Criteria.....75

Aleksander SZWED, Inez KAMIŃSKA

Chapter VI

Yield Criteria for Concrete Built of Deviatoric and Meridional Shape Functions 85

Aleksander SZWED, Inez KAMIŃSKA

Chapter VII

Dissipation Function and Elastoplastic Constitutive Relationships Based on Smooth
Drucker-Prager Yield Condition.....95

Aleksander SZWED

Chapter VIII

Examples of Elastoplastic Damage Models Obtained from Energy and
Dissipation Potentials.....107

Inez KAMIŃSKA, Aleksander SZWED

Chapter IX

Stability of a Square Sheet of Rubber-Like Material under Symmetric Biaxial Loading ... 125

Stanisław JEMIOŁO

Chapter X

A Note on the Implementation of the Hyperelastic Kilian Model in the Abaqus135

Aleksander FRANUS

Chapter XI

Scope of Application of the Murnaghan Hyperelastic Model for Elastomers145

Stanisław JEMIOŁO, Aleksander FRANUS, Włodzimierz DOMAŃSKI
