

## CONTENTS

<b>BASIC NOTATION</b>	9
<b>1. INTRODUCTION</b>	11
<b>2. FUNDAMENTAL SOLUTIONS AND BOUNDARY ELEMENT METHOD</b>	15
2.1. Fundamental solutions of linear differential operators	16
2.2. Fundamental solutions in the <b>magnetoelastoelectroelastic</b> continuum theory	21
2.3. Applications in the boundary element method	30
<b>3. MODEL OF THE MAGNETOELECTROELASTIC CONTINUUM</b>	36
3.1. Constitutive equations	37
3.2. <b>Micromechanics</b> of the magnetoelastoelectroelastic continuum	45
3.3. Field equations	54
3.4. Summary	57
<b>4. FUNDAMENTAL SOLUTIONS FOR THE GENERAL PROBLEM OF DYNAMICS OF THE MAGNETOELECTROELASTIC CONTINUUM</b>	58
4.1. Equations of dynamics in the state space	58
4.2. Equations of dynamics as a hiperbolic system	62
4.3. Fundamental solutions for symmetric equations of dynamics in the state space	73
4.4. Harmonic fundamental solutions	79
4.5. Dynamics of the magnetoelastoelectroelastic continuum in two time scales	82
4.6. Summary	89
<b>5. FUNDAMENTAL SOLUTIONS FOR THE PROBLEM OF DYNAMICS OF THE MAGNETOELECTROELASTIC CONTINUUM IN THE QUASI- STATIC APPROXIMATION</b>	90
5.1. Equations of dynamics in the quasi-static approximation	90

5.2. Fundamental solutions for equations of dynamics in the quasi-static approximation.....	93
5.3. Method of stiffening.....	95
5.4. Reduction method.....	98
5.5. Shifting method.....	105
5.6. Drazin inverse matrix method.....	113
5.7. Weierstrass canonical form of equations of dynamics in $\mathbf{k}$ -space and quasi-static approximation.....	120
5.8. Summary.....	126
<b>6. THE NUMERICAL DETERMINATION OF FOURIER OSCILLATORY INTEGRALS.....</b>	<b>128</b>
6.1. Oscillatory integrals.....	129
6.2. Review of selected numerical methods.....	134
6.3. Summary.....	147
<b>7. FINAL REMARKS.....</b>	<b>148</b>
<b>BIBLIOGRAPHY.....</b>	<b>153</b>
<b>Abstract.....</b>	<b>169</b>
