List of major symbols and abbreviations 5

Safety and chemistry laboratory rules 7

EXERCISE 1 Kinetics of electrode processes. Galvanic cells. Electrolysis (W. Gumowska) 9

EXERCISE 2 Corrosion rate of metals (E. Rudnik) 23

EXERCISE 3 Identification of solid products of corrosion (E. Rudnik) 35

EXERCISE 4 Coulometric analysis of solid corrosion products (W. Gumowska) 51

EXERCISE 5 Corrosion of aluminum in aqueous solutions (E. Rudnik) 61

EXERCISE 6 Selective corrosion of brass (W. Gumowska) 69

EXERCISE 7 Stress corrosion cracking of alloys (E. Rudnik) 79

EXERCISE 8 High-temperature corrosion of metals (W. Gumowska) 87

EXERCISE 9 Bimetallic corrosion – hydrogen depolarization (E. Rudnik, W. Gumowska) 95

EXERCISE 10 Bimetallic corrosion – oxygen depolarization (E. Rudnik, W. Gumowska) 101

EXERCISE 11 Anodic processes. Active dissolution of metals. Passivation (W. Gumowska) 107

EXERCISE 12 Stray current corrosion (I. Harańczyk, E. Rudnik) 113

EXERCISE 13 Protection against stray current corrosion (I. Harańczyk, E. Rudnik) 123

EXERCISE 14 Impressed current cathodic protection (I. Harańczyk, W. Gumowska, E. Rudnik) 131

EXERCISE 15 Cathodic protection with sacrificial anodes (E. Rudnik) 139

EXERCISE 16 Electroplated coatings (E. Rudnik) 147

EXERCISE 17 Coulometric analysis of metallic coatings (W. Gumowska) 159

EXERCISE 18 Conversion coatings (W. Gumowska) 167

EXERCISE 19 Oxide coatings on aluminum (W. Gumowska) 179

EXERCISE 20 Influence of corrosion inhibitors on kinetics of electrode processes (E. Rudnik) 191

EXERCISE 21 Acid pickling inhibitors for steel (E. Rudnik) 197

EXERCISE 22 Synergy and antagonism of inhibitors (E. Rudnik) 205
