

## CONTENT

<b>Introduction</b> .....	7
<b>Lecture 1. Set Calculus</b> .....	9
1.1. Concept of a Set.....	9
1.2. Operations on Sets.....	13
1.3. The Concepts of Partition and Cover of a Set.....	15
Examples of Typical Exercises for Lecture 1.....	17
<b>Lecture 2. Cartesian Product of Sets. Relations on Sets</b> .....	19
2.1. Cartesian Product of Sets.....	19
2.2. Binary Relation.....	21
2.3. Representation of Binary Relations on Finite Sets using Graphs and Matrices.....	26
2.4. Typical Operations on Relations.....	27
2.5. Concept of Multidimensional Relation.....	28
Examples of Typical Exercises for Lecture 2.....	30
<b>Lecture 3. Functions. Equivalence Relation</b> .....	33
3.1. Function (Functional Relation).....	33
3.2. Types of Functions.....	36
3.3. Equivalence Relation.....	40
Examples of Typical Exercises for Lecture 3.....	41
<b>Lecture 4. Ordering Relations</b> .....	43
4.1. Partial Ordering Relation.....	43
4.2. Linear Ordering Relation.....	46
4.3. Strong Ordering Relation.....	48
4.4. Strong Linear Ordering Relation.....	48
4.5. The Largest and Smallest Element in the Set. Supremum and Infimum of a Partially Ordered Set.....	49
4.6. Well-Ordering Relation.....	51
Examples of Typical Exercises for Lecture 4.....	51

<b>Lecture 5. Algebraic Systems.....</b>	<b>53</b>
5.1. Algebraic Operations.....	53
5.2. Definition of the Algebraic System. Algebraic Structure and Relational System.....	55
5.3. Groupoid. Semigroup. Group. Subgroup.....	56
5.4. Isomorphism of Algebraic Systems.....	61
Examples of Typical Exercises for Lecture 5.....	62
<b>Lecture 6. Rings as Algebraic Structures. Boolean Algebra.....</b>	<b>65</b>
6.1. Rings as Algebraic Structures.....	65
6.2. Application of Ring Theory.....	69
6.3. Boolean Algebra.....	70
Examples of Typical Exercises for Lecture 6.....	73
<b>Lecture 7. The Equinumerous Relation of Sets. Cardinal Numbers.....</b>	<b>75</b>
7.1. The Concept of the Equinumerous Relation of Sets. Cardinal Numbers.....	75
7.2. Countable Sets.....	76
7.3. Uncountable Sets.....	78
7.4. Cantor-Bernstein Theorem. Comparison of Cardinal Numbers.....	79
Examples of Typical Exercises for Lecture 7.....	82
<b>Lecture 8. Introduction to Logic. Classical Propositional Logic     as the Basis of Mathematical Logic.....</b>	<b>83</b>
8.1. Introduction to Logic.....	83
8.2. Classical Propositional Logic. The Statement and its Mathematical Formalization.....	87
8.3. Logical Operations on Statements.....	89
Examples of Typical Exercises for Lecture 8.....	93
<b>Lecture 9. The Language of Propositional Calculus.     Zero-One Method of Checking the Tautology of Expressions.....</b>	<b>95</b>
9.1. The Concept of Formal Language. Formalization and Interpretation Procedures.....	95

9.2. The Language of Propositional Calculus.....	98
9.3. Formulas of Propositional Logic as Functions of Statement Variables.....	102
9.4. Types of Propositional Logic Formulas.....	102
9.5. Zero-One Method of Checking the Tautology of Formulas.....	104
9.6. Logically Equivalent Formulas.....	105
Examples of Typical Exercises for Lecture 9.....	106
<b>Lecture 10. Inference Rules in the Classical Propositional Logic. Propositional Logic as a Formal Axiomatic System.....</b>	<b>109</b>
10.1. The Concept of Inference. Formalization of Inferences. The Inference Scheme.....	109
10.2. Typical Inference Rules.....	111
10.3. Theory as the Most Developed Form of Knowledge. Types of Theories.....	113
10.4. Formal Axiomatic Systems.....	116
10.5. Propositional Logic as a Formal Axiomatic System.....	118
Examples of Typical Exercises for Lecture 10.....	120
<b>Lecture 11. Logical Functions. Elements of Algebra of Logic.....</b>	<b>123</b>
11.1. The Concepts of a Logical Variable and a Logical Function.....	123
11.2. Some Properties of Logical Functions.....	125
11.3. Algebras of Logic.....	127
11.4. Application of Binary Boolean Algebra.....	131
Examples of Typical Exercises for Lecture 11.....	131
<b>Lecture 12. Elements of Logic of Concepts.....</b>	<b>135</b>
12.1. Connotation and Denotation of Concept.....	135
12.2. Classification of Concepts.....	136
12.3. Relations Between Concepts.....	139
12.4. Operations on Concepts.....	144
Examples of Typical Exercises for Lecture 12.....	152

<b>Lecture 13. Elements of Predicate Logic</b> .....	155
13.1. Definitions and Properties of Predicates.....	155
13.2. Types of Predicates. The Truth Set of the Predicate.....	156
13.3. Logical Operations on Predicates.....	159
13.4. Quantifier Binding Operations on Predicates.....	161
13.5. Square of Opposition.....	165
Examples of Typical Exercises for Lecture 13.....	167
<b>Lecture 14. Predicate Logic as a Formal Axiomatic System. Presentation of Basic Concepts of Set Theory Based on Predicate Logical Expressions</b> .....	169
14.1. Predicate Logic as a Formal Axiomatic System.....	169
14.2. Presentation of the Basic Concepts of Set Theory Based on Expressions of Predicate Logic.....	174
Examples of Typical Exercises for Lecture 14.....	177
<b>Lecture 15. Introduction to the Theory of Fuzzy Sets and Fuzzy Logic</b> .....	179
15.1. About the Fuzzy Approach in Mathematics and Logic.....	179
15.2. Fuzzy Sets. Operations on Fuzzy Sets. Fuzzy Sets Algebra.....	180
15.3. Distances Between Fuzzy Sets. Fuzzy Relations.....	185
15.4. Fuzzy Statements. Logical Operations on Fuzzy Statements.....	187
15.5. Fuzzy Variable and Linguistic Variable.....	189
Examples of Typical Exercises for Lecture 15.....	190
<b>Dictionary</b> .....	193
<b>Bibliography</b> .....	198
